

VEDANT LALIT BHATT

(404) 333-1778 | vbhatt35@gatech.edu | linkedin.com/in/vedantlbhatt | github.com/vedantlbhatt | vedantlbhatt.com

EDUCATION

Georgia Institute of Technology

Atlanta, GA

B.S. in Computer Science | GPA: 3.8

Expected May 2027

- **Concentrations:** Intelligence and Information Networks
- **Relevant Coursework:** Introduction to AI, Data Structures and Algorithms, Database Systems and Networks
- **Scholarships & Awards:** Zell Miller Scholarship, Georgia Certificate of Merit, IT Specialist Certiport Software Development

EXPERIENCE

Expedia Group

Seattle, WA

Incoming Software Development Intern

May 2026 – July 2026

Brain Lab Research Group

Atlanta, GA

Undergraduate Researcher

September 2025 – Present

- Conducted computational research with brain-computer interfaces to analyze brain waves and extract actionable insights
- Built Python pipelines to preprocess EEG signals using filtering, epoching, and artifact removal to prepare real-time data
- Applied adaptive noise cancellation to remove power line interference, improving signal fidelity via 28% noise reduction

Quilly

Atlanta, GA

Software Engineer Intern

August 2025 – December 2025

- Collaborated with 7 interns, coordinating daily stand-ups and sprint planning to streamline collaboration and Agile workflow
- Optimized PostgreSQL with indexing, batch writes, and connection pooling, improving read times by 75% and writes 60%
- Integrated Redis caching to reduce data fetch latency and server load, enabling faster user responses and higher throughput

King of the Curve

Remote

Software Engineer Intern

May 2025 – July 2025

- Refactored 20+ Flutter components using Riverpod for state management, iterating features collaboratively with Agile sprints
- Optimized cross-platform app load times by 30% through image compression, lazy loading, and asynchronous data fetching
- Implemented offline data caching, restoring app usability and activity for 4,000+ monthly users in low-connectivity areas

Big Data Big Impact - FishCast

Atlanta, GA

Data Engineer

January 2025 – May 2025

- Built ETL pipelines processing NOAA and Fishbase data using Python, enabling predictive modeling of marine movement
- Trained LSTM models on habitat data, achieving 87% accuracy with 5-fold cross-validation to forecast Atlantic Cod shifts
- Designed GIS dashboards on AWS EC2 using Lambda for preprocessing, applying event-driven architecture for insights

Alpha Kappa Psi

Atlanta, GA

Director of Software Development

January 2025 – Present

- Led team of 10 developers to create a React website used by 200+ members, streamlining member tracking and performance
- Implemented WebSockets for real-time communication, integrating MongoDB for storage and driving latency under 100ms
- Refactored slow REST routes by minimizing overfetching and indexing high-traffic queries, decreasing wait times by 35%

PROJECTS

GT Transit — React, Python, FastAPI, Google Maps, Docker, Git

October 2025

- Built full-stack searchable bus route finder application for 2,000+ monthly active users for Georgia Tech students
- Designed algorithm optimizing stop selection to minimize walking distance while ensuring efficient route matching

FileAI — TypeScript, Python, OpenAI CLIP, HuggingFace, FAISS, CedarOS, NumPy, Git

September 2025

- Built an interactive natural language chatbot enabling users to execute file actions: create, move, organize, zip, and search
- Implemented semantic file parsing, mapping file contents to vector embeddings for efficient representation and retrieval

MySQL - Runner — TypeScript, Node.js, Python, Flask API, MySQL, Ollama, Git

August 2025

- Developed a VS Code extension integrating Ollama's Llama3.2 NLP model to convert natural language queries into SQL
- Increased output accuracy by 30% using schema-aware prompts to ensure valid table and column names in generated queries

SKILLS

Languages: Java, HTML, CSS, Python, Assembly, Swift, SwiftUI, C#, C, SQL, JavaScript, TypeScript

Software: Visual Studio Code, Git, Excel, Word, Powerpoint, Jira, Axios, XCode, PyCharm, IntelliJ IDEA, Terminal/Bash

Frameworks/Platforms: React.js, Node.js, Hugging Face, Linux, Pandas, Flask, REST, AWS, GraphQL, Docker, GCP, RDBMS
